

MiniMuffs®

Provide a safe environment for healthy development

Ideal during special patient care procedures and transport

- Protects baby's sensitive ears.
- Reduces disruptive noise associated with transfer of infants to different hospital units and provides a quieter environment during transport in emergency vehicles.

Safe and comfortable

- Fits comfortably around the baby's ears with a soft foam oval-shaped design and gentle hydrogel adhesive.
- Meets infection control standards through single-patient use design.

By reducing noise levels, MiniMuffs® noise attenuators result in potentially longer periods of sleep time, optimal oxygenation and improved physiological stability.

REORDER #: 040341

36 individually wrapped pairs per box

Dimensions:
0.31 x 1.125 x 1.375 in.
