

# OraSwab

Our gentle foam tip applicator provides your babies with a comfortable and soothing oral care experience

## BABIES ENJOY IT

Caregivers have reported that babies find the gentle swabbing action enjoyable.

Administering oral care is a quick process, typically taking only a few minutes during touch time, once per shift, or as needed (please ensure compliance with your hospital's protocol).

Oral care offers a valuable opportunity for proactive family involvement when the family, staff, and the baby are ready.

Parents often become capable of performing the oral care protocol themselves, allowing them to actively participate in their baby's care.

- The foam tip applicator is both soft and safe, making it an ideal choice for your oral care needs.
- General cleaning and the removal of bacteria using a solution.
- Applicators come in two convenient sizes: extra-small (6mm wide) and small (9mm wide).

Comfortable oral care

Comfortable foam and cotton tip for extra absorbency

Item #	Description	Qty Per Box
<b>006481</b>	Extra-small 6mm wide and Small 9mm wide OraSwabs	400 per box
