

Radiolucent Papoose Board MRI Safe

The MRI and X-ray Safe, Radiolucent Papoose Board is specifically designed for infants and is entirely metal-free.

This safety papoose board operates by securely binding the child to the rigid board to minimize movement, ensuring clear scans.

The patient can be immobilized in under 60 seconds, resulting in faster scans and shorter procedure times.

Canvas flaps allow for easy patient restraint and includes four arm/wrist straps for additional immobilization.

Material: Nylon
Weight: 3LBS Board
Color: White/Blue/Black
